

# CALL FOR VISUAL ARTISTS!

## News of the Day in Review and Discussion Lounge

We are creating a community arts troupe to comment on current events.  
Artists and performers— take an active stance and join the creative resistance!

This is a call for artists, writers, and performers, who agree that current events are important, even frightening, and who are interested in exploring the themes of tragedy and comedy which are on display in our country's behavior and leadership. Are you interested in developing archetypes, allegory, symbolism and metaphor in the service of the big events of our time? We'll be alchemizing current events through live dinner theater performances, twice per month. Do you want to work towards creating characters and events that are mythic, allegorical and metaphorical? Do you believe that this kind of complexity will best serve your creativity and make your message more impactful? Reach out!

Principals will include playwrights, actors, visual artists, dancers, spoken word, and comedians. Principals to be paid a \$200 stipend per month and a percentage of the gate when applicable.

**News of the day in Review: What will it look like?** The events will be in the variety show format, a cross between the gravity and seriousness of the Oregon Shakespeare Festival and the playfulness of SNL. Because of the two week time interval between shows this will have a spontaneous and improv vibe.

Next Performance Date: January 25, 2026. Further dates to be scheduled on the 2nd and 4th Sunday
